DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-35 have been considered but are moot in view of the new ground(s) of rejection.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).

Art Unit: 3749

- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-15, 17-32, and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by **Seibert et al (5,353,949)**. **Seibert et al** discloses vent assembly (10 & 60) that has a metal body (64) having an aperture (82), a first membrane bearing surface (70), a second membrane bearing surface (92), a porous membrane (90) having a first side in contact with the first membrane bearing surface and a second side in contact with the second membrane and forming a seal around the aperture, and a cap (66) inherently protecting the membrane.

Claims 1-9, 11-15, 17-22, 24, 26-31, 34, and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by **Closkey (6,464,425)**. **Closkey** discloses a vent assembly (SEE Figures 6-10) and includes a metal body (508) having an aperture for the passage of fluid, a first membrane bearing surface (SEE Figures 8 & 9), a second membrane bearing surface (502), a porous membrane (10) with filler, contacting the first bearing surface and second membrane bearing surface forming a seal, a cap (503)

having passages (504), wherein the membrane is made of PTFE (SEE column 5, lines 19-40).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16 & 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over either **Seibert et al (5,353,949)** or **Closkey (6,464,425)**. Both Seibert et al and Closkey teach the applicants primary inventive concept as stated above, but does not specifically recite that the vent body is made of stainless steel. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to have case the metal vent body out of stainless steel since it would have involved a mere selection of a metal based on the basis of suitability for the intended use.
